

2T SECURITY

Carbon Reduction Plan

Supplier name:2T Security Ltd.....

Publication date:10/03/2026.....

Commitment to achieving Net Zero

2T Security Ltd is committed to achieving Net Zero emissions by 2046.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past, and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2026

Additional Details relating to the Baseline Emissions calculations.

This carbon reduction plan represents 2T Security's preliminary/initial baseline for carbon reduction. As an expanding Small to Medium-sized Enterprise (SME) that has recently opened a new central office, it is important to recognise that our carbon emissions are likely to vary (from any baseline) in the short term as working patterns become established.

The Current Emissions Reporting table below will form our baseline.

Being an SME has enabled 2T Security to have carbon reduction at its core, prior to any formal regulatory requirement.

Baseline year emissions: 2026

EMISSIONS

**TOTAL
(tCO₂e)**

Scope 1

0.00

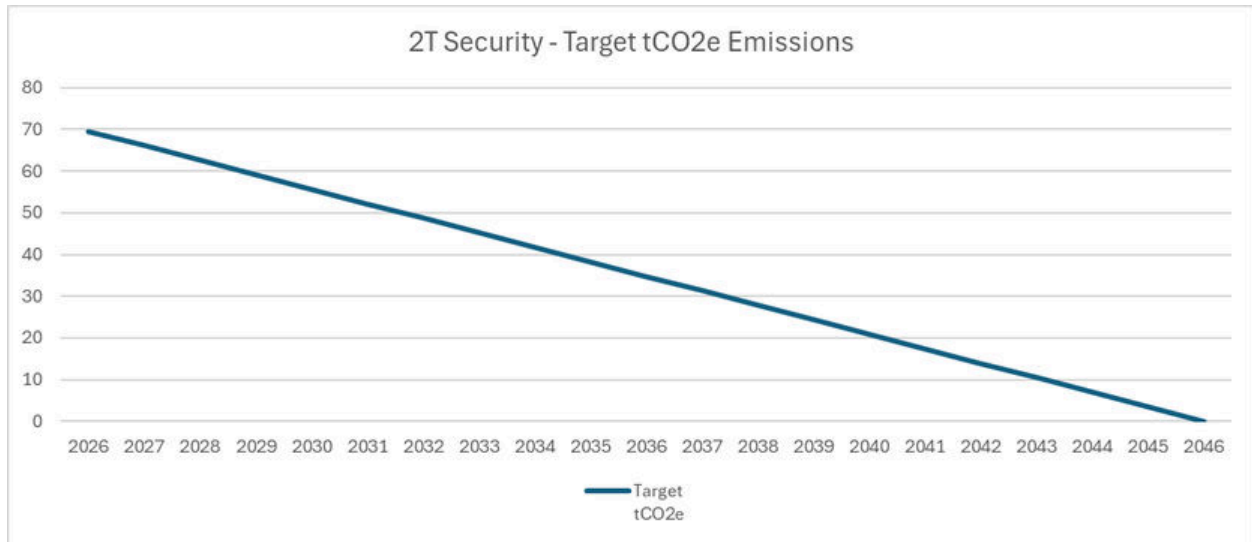

Scope 2	17.12
Scope 3	50.55
-Upstream transportation and distribution	0.00
-Waste generated in operations	45.66
-Business travel	3.05
-Employee commuting	1.84
-Downstream transportation and distribution	0.00
Total Emissions	67.67

Current Emissions Reporting

Reporting Year: 2026	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0.00
Scope 2	17.12
Scope 3	50.55
-Upstream transportation and distribution	0.00
-Waste generated in operations	45.66
-Business travel	3.05
-Employee commuting	1.84
-Downstream transportation and distribution	0.00
Total Emissions	67.67

Emissions reduction targets

In order to continue our progress to achieving Net Zero by 2046, we have adopted the following carbon reduction targets:

We project that carbon emissions will decrease over the next five years to 50.75 tCO2e by 2031. This is a reduction of 25%.

This commitment assumes our business size remains static, as any significant growth (or reduction) will likely require a re-baseline exercise.

Carbon Reduction Projects

The following environmental management projects have been implemented, however, as 2026 will be the first year that we have baselined, we have no carbon emission reduction measurements to report against at this stage. All of the following measures will be in effect when performing the contract.

Completed Carbon Reduction Initiatives

- Electric Vehicle only company car policy
- Decarbonised logistics - We have implemented hybrid working, resulting in fewer business trips
- Digital first / limited printing
- Encouraging car sharing
- Reuseable office supplies
- Prioritise public transport use
- Preference for remote meetings
- Responsible procurement of IT and services
- Digital-first operations to reduce paper usage
- Opening a new office close to public transport hub

As we already have an implemented policy of zero carbon emissions from company controlled vehicles, our Scope 1 baseline is already at 0 tCO2e. This company policy is not going to change, and hence our target is to remain at 0 tCO2e.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Improve energy efficiency in office, equipment and processes, e.g.,
 Low energy lighting, and Smart radiator controls
- Adopt circular economy practices (reduce, reuse, recycle, repair),
 e.g., Upgradeable/reuseable laptops
- Further staff engagement on communicating company carbon plan
- Renewable energy initiatives
- Engagement with landlord to improve office heat retention
- Automated shutdown of non-essential equipment
- Detailed power consumption monitoring of data centre equipment

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

G. Ambler
